

# CAPITAL DISTRICT DATA

SEPTEMBER/OCTOBER 1999

VOLUME 22, NUMBER 5

## 2000 Census Employment

On April 1, 2000, the Census Bureau will be conducting an extensive survey of the 275 million people across the United States. To successfully undertake this extremely important effort, the Bureau must recruit workers. In the Capital Region alone, over 1,000 temporary employees will be hired. Most Census takers will work from mid-April to mid-June of the Year 2000, and most will be asked to work primarily in the neighborhoods in which they live. The Census takers will spend the majority of their time locating addresses and conducting door-to-door interviews. Successful candidates should be able to work independently and be interested in meeting with and talking to people.

Applicants should generally be 18 years or older. Persons who are 16 and 17 may be hired for selected positions in accordance with federal, State, and local requirements. Applicants must take a written test of basic skills and pass a security check. Most of the work will be in the evening hours and on weekends. In the Capital Region, the hourly pay will generally be in the \$9 to \$11 range. Employees are paid to attend training and are reimbursed for mileage costs. Census takers are not eligible for coverage under the Health Benefits program, Life Insurance Program, or Federal Employees Retirement System. However, Census takers are eligible for benefits under the Federal Employees Compensation Disability Act for disability due to any injury sustained in the performance of their Census duties, and unemployment compensation under the Federal Employees' Program.

If you or anyone you know is looking for employment, please have them contact the Albany Census Bureau office at 518-464-4042 or visit the Census Bureau's Web site at <http://www.census.gov> for additional information.

The importance of an accurate Census count in New York and the Capital Region can not be over-emphasized. The Census is not just an enumeration of the population, it will also provide crucial information that will help the Region succeed in the next decade. Political, financial, and planning decisions for at least the next ten years will be based on Census results. The few minutes it will take each of us to fill out the Census form will be an investment worth potentially millions of dollars. We each have a responsibility to assure that an accurate count is performed in our communities. Remember, the accuracy of *Census 2000* depends on the fullest possible participation of all.

## Capital Region Public School Data

As part of its annual report to the Governor and the Legislature, the State Education Department submits *Statistical Profiles of Public School Districts*, which contain detailed information on students, faculty, fiscal measures, and test results for each public school district in the State.

For the first three categories, CDRPC has compiled a database for the reporting years 1987-88 through 1997-98. Data items which are not available for some of the smaller school districts, such as North Greenbush Common Schools, are indicated by blank values in the table. Estimates for county and Regional totals were based on averages weighted by student enrollment or teachers.

### Table and Chart Definitions

**Total Enrollment** represents the number of students enrolled in kindergarten through twelfth grade and those in ungraded classes for children with disabilities.

**FTE Enrollment for General Education** is the full-time equivalent K-12 daily membership plus students for whom the district pays tuition to another school district, including students classified both with and without disabilities.

**FTE Enrollment for Special Education** is the full-time equivalent K-12 count of students with disabilities.

**Poverty Level Children** (percentage) is the number of children age 5-17 in families below the poverty level divided by the total number of children age 5-17, as derived by the State Education Department from *Census* data.

**Percent Regents Diploma** is the number of H.S. graduates receiving Regents diplomas divided by total diplomas. In the late 1980's, differences between the adopted curriculum plans of certain school districts and a new Regents Action Plan resulted in those districts granting few or no Regents Diplomas.

**Percent to College** is the number of High School graduates entering 4-year, 2-year, or other post-secondary institutions divided by the total number of graduates.

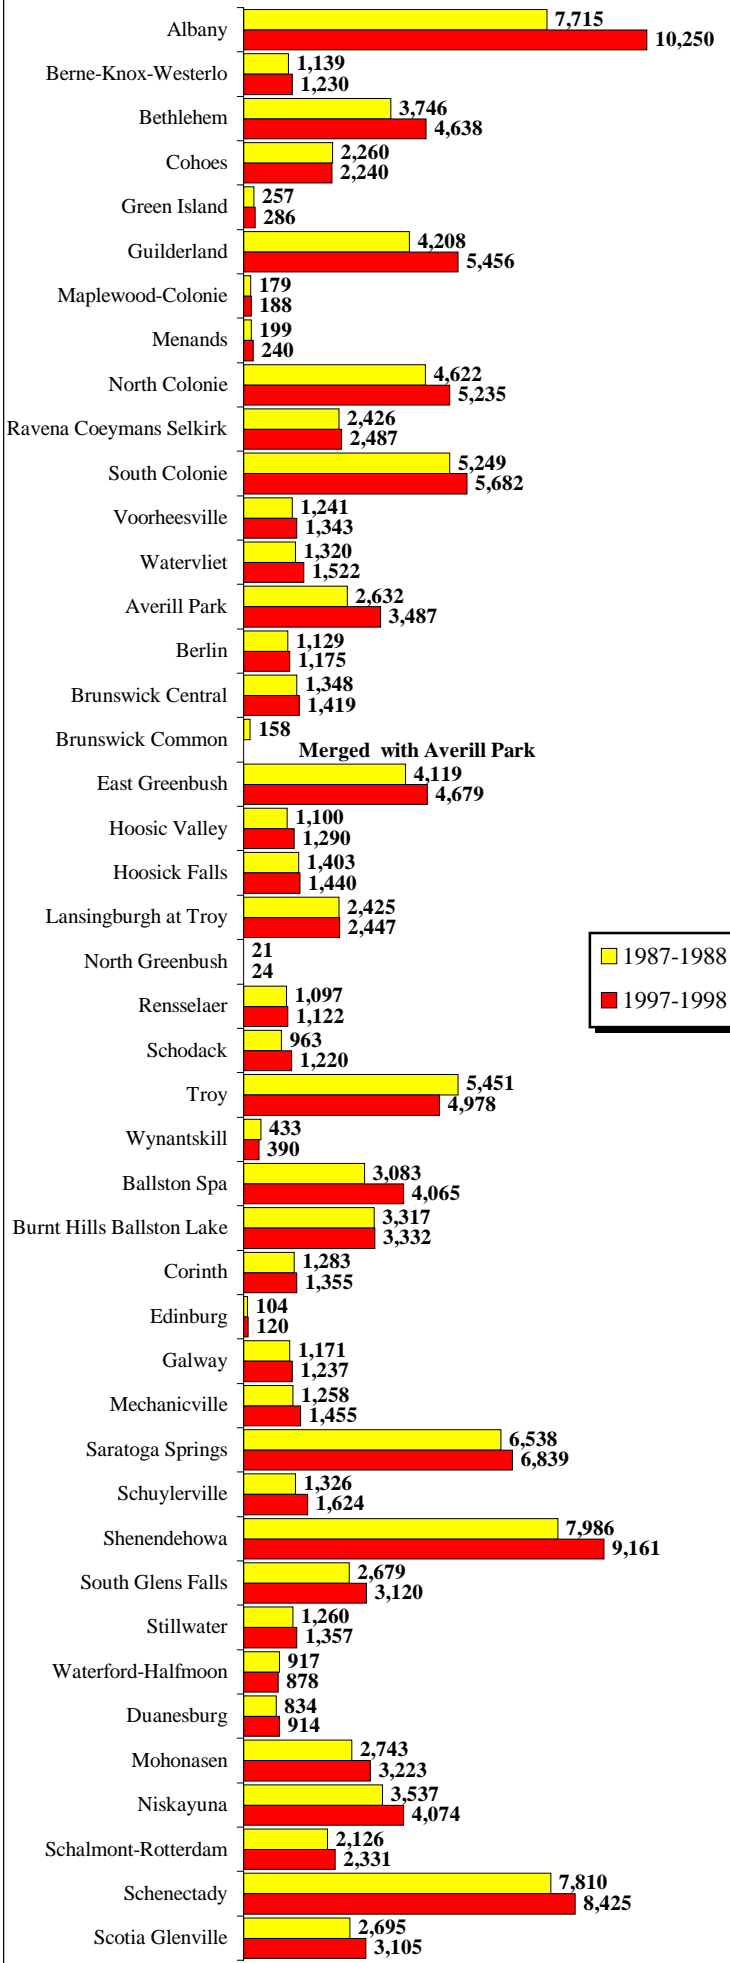

**Pupil to Teacher Ratio** is district enrollment divided by the number of full- and part-time classroom teachers.

**Median Salary** is the median for all full-time public school classroom teachers in a district. Statistically, half of all teachers will be earning less than, and half more than the median salary. This data is omitted in years for which a district did not have a salary agreement in effect. Care should be exercised in using median teacher salaries for comparisons. Teachers' salaries are typically {cont. on page 4}

## Capital Region Public School Data, continued

determined by a combination of education level and experience. Without access to a district's "Teachers' Scale," the matrix giving base salaries for various combinations of education and experience, it is not possible to fairly compare teacher compensation among districts. High median salaries in a district may reflect a high level of teacher education and/or experience and/or a Teachers' Scale with high base salaries.

**Expenditures Per Pupil** is total district expenditures divided by average daily enrollment. Expenditures include general, debt service, and special aid funds, but exclude the State aid withheld as the State's share of local Teachers' Retirement System and Employees'

Retirement System savings. Enrollment includes students enrolled in district programs; disabled pupils educated in the district, BOCES, \$4402 and \$4405 programs (including the State schools at Rome & Batavia); and students educated in other districts for whom the district pays tuition. Pre-kindergarten and half-day kindergarten pupils are counted at 50%. Expenditures per pupil are not reported for school districts with fewer than eight teachers.
