SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2014 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	United States			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	116,211,092	+/-230,463	116,211,092	(X)
Family households (families)	76,958,064	+/-211,732	66.2%	+/-0.1
With own children under 18 years	33,917,911	+/-174,912	29.2%	+/-0.1
Married-couple family	56,270,862	+/-267,981	48.4%	+/-0.1
With own children under 18 years	22,823,632	+/-202,088	19.6%	+/-0.1
Male householder, no wife present, family	5,543,754	+/-33,627	4.8%	+/-0.1
With own children under 18 years	2,662,944	+/-17,956	2.3%	+/-0.1
Female householder, no husband present, family	15,143,448	+/-37,330	13.0%	+/-0.1
With own children under 18 years	8,431,335	+/-23,990	7.3%	+/-0.1
Nonfamily households	39,253,028	+/-36,269	33.8%	+/-0.1
Householder living alone	32,036,772	+/-62,486	27.6%	+/-0.1
65 years and over	11,569,876	+/-105,689	10.0%	+/-0.1
Households with one or more people under 18 years	37,895,810	+/-173,812	32.6%	+/-0.1
Households with one or more people 65 years and over	30,294,116	+/-97,770	26.1%	+/-0.1
Average household size	2.63	+/-0.01	(X)	(X)
Average family size	3.23	+/-0.01	(X)	(X)
RELATIONSHIP				
Population in households	306,058,480	*****	306,058,480	(X)
Householder	116,211,092	+/-230,463	38.0%	+/-0.1
Spouse	56,242,970	+/-263,850	18.4%	+/-0.1
Child	93,459,419	+/-80,254	30.5%	+/-0.1
Other relatives	22,147,046	+/-234,312	7.2%	+/-0.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes

when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
