SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

**Tell us what you think.** Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	East Greenbush town, Rensselaer County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>HOUSEHOLDS BY TYPE</b>				
Total households	6,588	+/-225	6,588	(X)
Family households (families)	4,292	+/-227	65.1%	+/-3.7
With own children of the householder under 18 years	1,860	+/-190	28.2%	+/-3.2
Married-couple family	3,552	+/-201	53.9%	+/-3.3
With own children of the householder under 18 years	1,471	+/-192	22.3%	+/-3.2
Male householder, no wife present, family	209	+/-116	3.2%	+/-1.8
With own children of the householder under 18 years	109	+/-81	1.7%	+/-1.2
Female householder, no husband present, family	531	+/-163	8.1%	+/-2.5
With own children of the householder under 18 years	280	+/-113	4.3%	+/-1.7
Nonfamily households	2,296	+/-288	34.9%	+/-3.7
Householder living alone	1,918	+/-267	29.1%	+/-3.4
65 years and over	666	+/-157	10.1%	+/-2.3
Households with one or more people under 18 years	2,031	+/-175	30.8%	+/-3.0
Households with one or more people 65 years and over	1,649	+/-146	25.0%	+/-2.0
Average household size	2.45	+/-0.08	(X)	(X)
Average family size	3.07	+/-0.11	(X)	(X)
<b>RELATIONSHIP</b>				
Population in households	16,109	+/-133	16,109	(X)
Householder	6,588	+/-225	40.9%	+/-1.4
Spouse	3,578	+/-192	22.2%	+/-1.2
Child	4,756	+/-334	29.5%	+/-2.0
Other relatives	538	+/-166	3.3%	+/-1.0
Nonrelatives	649	+/-226	4.0%	+/-1.4
Unmarried partner	363	+/-138	2.3%	+/-0.9

Subject	East Greenbush town, Rensselaer County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>MARITAL STATUS</b>				
Males 15 years and over	6,575	+/-316	6,575	(X)
Never married	1,915	+/-296	29.1%	+/-3.6
Now married, except separated	3,781	+/-209	57.5%	+/-3.9
Separated	168	+/-92	2.6%	+/-1.4
Widowed	254	+/-108	3.9%	+/-1.6
Divorced	457	+/-154	7.0%	+/-2.3
Females 15 years and over	6,975	+/-310	6,975	(X)
Never married	1,828	+/-340	26.2%	+/-4.2
Now married, except separated	3,740	+/-187	53.6%	+/-3.6
Separated	104	+/-70	1.5%	+/-1.0
Widowed	555	+/-153	8.0%	+/-2.1
Divorced	748	+/-183	10.7%	+/-2.6
<b>FERTILITY</b>				
Number of women 15 to 50 years old who had a birth in the past 12 months	107	+/-54	107	(X)
Unmarried women (widowed, divorced, and never married)	0	+/-18	0.0%	+/-24.1
Per 1,000 unmarried women	0	+/-17	(X)	(X)

Welsh	224	+/-134	1.4%	+/-0.8
West Indian (excluding Hispanic origin groups)	87	+/-71	0.5%	+/-0.4
COMPUTERS AND INTERNET USE				
Total households	(X)	(X)	(X)	(X)
With a computer	(X)	(X)	(X)	(X)
With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data).

The effect of nonsampling error is not represented in these tables.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013. For more information, see: Language User Note.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
