

## Types of Curb Extensions

### Pinchpoints

Curb extensions at mid-block or intersection corners that narrow a street by extending the sidewalk or widening the planting strip. These can include mid-block crossing locations. (Photo credit: Kevin

Robert Perry)

### Gateways

A curb extension located at the entrance to a neighborhood street narrows the crossing length for pedestrians and reinforces a low-speed operating environment. (Photo credit: Dongho Chang,

Seattle Department of Transportation)

### Chicanes

A series of narrowings or curb extensions that alternate from one side of the street to the other forming S-shaped curves can be implemented to reduce motor vehicle speeds and unlock roadway space

for pervious surface or bioretention (Photo credit: thisbossi)
